Parallel Switching Unit

Description

The parallel unit enables 2 generators to be connected in parallel at the touch of a button. Note: Only two generators of the same type can be connected using this unit. The output performance of the unit doubles when the generators are switching in parallel.

Max. 3 Phase	400V	70 KW		Max. 3 Phase	208V	36 KW
Max . 1 Phase	230V	23 KW		Max 1 Phase	110V	11 KW

Generator

Single phase
 Three phase

Voltage _____

Performance _____

Frequency: 50 Hz
 60 Hz

Start System 12 V DC
 24 V DC

Attention: An additional cable with DP+ und DP- must be routed on ordering
