

## Genset Equipment and Accessories

Thank you for your interest in our products. This catalogue will provide you with a selection of our comprehensive accessory programme.

**The catalogue consists in two parts:**

In **Part 1**, you will find various equipment components for your genset that can be ordered in addition to the standard equipment set. Please note that equipment components,

unless stated otherwise, must be included in your order when purchasing the genset. The subsequent refitting is possible only if Fischer Panda has the pertinent upgrade kits available in their programme.

**Part 2** contains our accessory programme. Fischer Panda offers complete kits for installation and service tasks. All parts may also be ordered separately. All parts from the accessory programme can also be installed subsequently, i.e., after purchasing a genset.

*Our worldwide distributors and partners are able to help you to choose the best generator for your requirements.*

*Company Headquarters in Paderborn, Germany*

## Gensets Equipment Components

- Sound insulation
- Expanded generator functions
- Remote control
- Current distribution and switching

## Capsule material

glass fibre reinforced  
plastic (GFRP)  
stainless steel (MPL)

## Sound insulation materials

3D (thickness 25 mm)  
4DS (thickness 40 mm)  
6DS (thickness 60 mm)

# Sound insulation

The super low-noise sound insulation system

### For the highest standards of sound level

The most significant advantage of all Fischer Panda generators is the low sound level. The super low-noise sound insulation system are offered in different versions.

### Capsule designs

The Panda marine gensets up to 25 kW and all Panda vehicle gensets up to 12 kW are fitted with a sound insulation capsule made from glass fibre reinforced plastic (GFRP) as a standard.

Starting with the 30 kW (Marine) version or the 15 kW (vehicle) version, the capsule supplied is made from stainless steel (MPL).

# Sound Insulation Versions

## Sound insulation capsule versions

The Fischer Panda sound insulation capsules are available for order either in the standard design or as a higher quality version. The following upgrade options are available:

GFRP  
sound insulation capsule

## Sound insulation materials

The thickness of the sound insulation material is approx. 25 mm (3D) for the marine gensets and approx. 40 mm (4DS) for the vehicle gensets. For a surcharge, the sound insulation capsules can also be supplied with a thicker sound insulation of up to 60 mm (6 DS).

MPL sound insulation capsule

Possible upgrades are:

Sound insulation capsule variations		
Standard	Upgrade options	Upgrade
GFKRP 3D	MPL 4DS	Insulation thickness 40 mm instead of 30 mm, plus stainless steel capsule instead of glass fibre reinforced plastic capsule
MPL 4DS	MPL 6DS	Insulation thickness 60 mm instead of 40 mm

Generator with the color of your  
choice

Coatings

Individual Generator  
Color

suitable for generator

■ 8000x bis 30x

The standard finish is not always the best choice for you, e.g. if you want a generator, which should show a uniform appearance color with your vehicle.

We paint your generator individually according to your wishes, if you prefer a different color. Please inquire about details if desired

## Expanded Generator Function

2-pole installation

Sliding Rails

Sand filter

Water Heating

Battery Monitor

## Generator Equipment

## Expanded Generator Function

The functions of all Fischer Panda gensets can be expanded. For this purpose, Fischer Panda offers various equipment components that can be ordered along with the genset when it is purchased.

## 24 Volt Starter System

With this starter system, all required components are designed for 24 V. Many special applications require a 24 V starter system instead of the standard 12 V starter system, which is then connected to a 24 V battery.

The system consists in a 24 V electric starter, glow plugs, and a 24 V alternator. The internal control system of the gensets, however, still runs on 12 V.

24 Volt Starter System

### Generator for

- Panda 5000i
- Panda AGT 4000
- Panda 8000x - 18x
- Panda 8000i - 15000i
- Panda 7,5-4
- Panda 24x - 30x
- Panda 25i

### Hydraulic Coupling for operating a pump

The electromagnetic clutch coupling in a separate housing makes it possible to connect a hydraulic pump to various Fischer Panda gensets.

### Generator for

- Panda 8000x - 15000x
- Panda 8000i - 15000i
- Panda 7,5-4
- Panda 18x - 30x IC
- Panda 25i
- Panda 9-4
- Panda 12-4

Generator with Hydraulic Coupling

Sample installation of display kit

# Display Kit

The display kit consists in an oil pressure gauge and a cooling water temperature gauge and sensors on the genset. The gauges are supplied as detail parts and can e.g. be installed in the control cabinet. The contact lines are routed out of the genset. Additional gauges are available upon request. Supplied without a control cabinet!

Oil pressure gauge  
(Figure similar)

Cooling water temperature gauge  
(Figure similar)

for generators

- all Fischer Panda Generators (außer i-Serie und x-Serie)

# Keel Cooling

The generators are equipped with a dual circuit cooling system by default, i.e. the temperature of the coolant in the inner cooling circuit is cooled by an internal heat exchanger with fresh water.

On request, the generator can be ordered with a keel cooling. With a keel cooling, the cooling water of the motor is cooled by a pipe system at the outside of the hull.

for generators

- all Panda types starting with 8000x

## Hot Water Connection

The genset can be fitted with two extra connections for an external hot-water circuit. The hot water can be used e.g. for heating rooms. Water infeed (cold) and water outlet (hot) are fitted with a ball valve.

A thermostat valve is required and must be installed by the  
for generator

customer.

- for all AC gensets starting with Panda 8000 (3,000 RPM)
- for all AC gensets starting with Panda 6500 (3.600 UpM)
- for all AC gensets starting with Panda 7.5-4 (1,500 RPM)
- for all DC gensets starting with Panda AGT-DC 5000

Generator with hot water connection

Sample image

Water outlet  
(hot side)

Water infeed  
(cold side)

Sample representation - The connections can also be fitted on another side, depending on the genset model.

## Re-start Protection

The re-start protection prevents the genset from (re-)starting while it is in use. The re-start protection thus serves to protect the electric starter from damage.

*To operate an automatic system add-on for the remote control panel, it is mandatory to install a re-start protection.*

The kit consists in an electronic starter monitor with bracket, a cable set, and a speed sensor.

for generators

- for AC gensets Panda 4000 - 12000 (3,500 RPM)
- for all AC gensets starting with Panda 6500 (3.600 UpM)
- for all AC gensets starting with Panda 7.5-4 (1,500 RPM)
- for all DC gensets starting with Panda AGT-DC 5000

## 2-pole Installation

With 2-pole or floating ground installations, the earth connection is established between engine starter system (electric starter, glow plugs, and alternator) and the battery when the diesel engine is started up. After the start-up process, this connection is automatically disconnected, and the system is operated as an isolated circuit. The 2-pole installation i.g. helps to avoid galvanic corrosion.

The kit consists in an insulated continuous duty relay incl. cable set and is either preinstalled on the genset or can be purchased as an upgrade kit.

On demand, we will be pleased to advise you regarding a suitable 2-pole installation for your generator.

2-pole Installation

## Sliding Rails

Sliding Rails

Upon request, your generator can be fitted with a sliding rail. This for example allows pulling out the generator of the vehicle.

suitable

■ for all vehicle AC gensets 8000x - 30x

## Water Heater

Water heater for start capability up to -40 ° c.

suitable

■ for all vehicle AC gensets 8000x - 30x

Sandfilter

## Air Filter for sandy environment

Air filter especially for sandy environment

suitable

■ for all vehicle AC gensets 8000x - 30x

## Remote Control Panel

for controlling and monitoring the Panda genset

### Simple operation

The genset can be operated conveniently from the cabin with the Fischer Panda panels. It is even possible to switch multiple panels in parallel, or to operate them with a slave panel. This enables the user to operate the genset from different locations with great flexibility. One panel may be installed e.g. in the cabin and the other on the fly bridge, the trailer, or in the engine room.

### Functions

The remote control panel in its standard version for Panda 5000 and up monitors six functions: engine cooling water temperature, winding temperature, engine oil pressure, battery charge, 230 V AC circuit, cooling water leakage (optional).

If any of these functions show an abnormal status, the genset will shut down. The remote control panel can be upgraded with an automatic add-on to a "fully automatic panel". That way, the genset can be started and stopped externally by contact with an external device (e.g. timer).

### Monitoring of \*)

- Engine cooling water temp.
- Winding temperature
- Engine oil pressure
- Battery charge
- 230 V AC current
- Cooling water leakage (optional)\*

\*) in the standard version starting with Panda 6000

# iControl Remote Control Panel

for „Perfect Power“ i-series generators

Article No. 0000549

## Digital Remote Control Panel

The integrated display serves to present the most important data of the system as well as warnings and error messages.

The control panel is equipped with four buttons for operating the Panda iControl2 controller:

- On/Off button: Switching the Panda iControl2 controller on and off
- Start/Stop button: Starting and stopping the generator, confirming values in selection menus (Enter key)
- Cursor-up button Switching between display screens (up), counting values up in selection menus
- Cursor-down button Switching between display screens (down), counting values down in selection menus.

Data output on the default display screen::

- Battery voltage (supply voltage)
- Status field for operating modes (stand-by, pre-heat, starting, override, running, autostart, stopping)
- Operating hours of the generator
- Oil pressure status
- Cylinder head temperature
- Temperature of exhaust manifold
- Winding temperature
- Speed/RPM
- Utilisation in percent

Suitable for

■ all i-series generators

# Options for iControl Remote Control Panel

## More Control by **Master Slave Combination**

Bis zu drei Panel zusätzlich betreiben

Master Panel iControl

(already included in the scope of delivery)

Article No. 0000549

## Additional Remote Control Panel

A master/slave combination makes it possible to operate the genset with two or more remote control panels (up to three additional panel).

It is possible, for example, to start the generator with a remote control panel and to stop it with the other generator. The connection of a second remote control panel increases the control and therefore the security.

**NOTE: One remote control panel is already included in the genset scope of delivery. You merely have to order the desired quantity of slave panels the plus cables (5-core).**

**Data cable** (5-core)  
for connecting Panel and  
Generator, incl. ferrules

Article No. 0002970

Up to 3 iControl Slave Panel

Article No. 0000550

## Generator Operating possible from each Panel

The main panel acts as the "master panel" to which the genset is connected. The second remote control panel - the so-called "slave panel" - works in parallel with the main (master) panel, i.e., the genset can be operated with either the main panel or the slave panel.

# xControl Remote Control Panel - More than a Generator Control

for „Compact Power“ x-series  
Generators

*Compact  
Power*

The “xControl” management system offers a easy to operate system, a modern and simple system architecture and a modern communication interface.

xControl Generator and  
Control Unit

## Innovative Generator Control

In the age of modern data communications and energy systems, it is more and more important that the generator is able to integrate with an existing control and regulation system. Fischer Panda offers an extremely powerful and user-friendly generator control system:

- “Plug & Play” - reduced installation effort
- Modular system - easy to expand
- Logging and display of operational data - complete control at all times
- Comprehensive event logging - long term service
- Digital panel - easy to use and multilingual
- Communications interface - integration in other control systems
- Self-test of all functions - safe and reliable system
- Automatic start - remote control of generator
- Fast control - stable energy supply

Parallel operation of up to 5 control units are possible

## Components for xControl

Article No. 0000557

„The “xControl” comprises of three main components which are connected together using quick-connection plugs. These are the digital panel, a connection box on the generator and the actual control unit. Through intelligent communication of these three system components, a reliable operation of the generator is ensured.

Suitable for

■ all x generators

## Options for xControl Remote Control Panel

### Communication-Interface

Communication between the genertaor control and the CAN bus

The Fischer Panda FP Bus provides 100 % SAEJ1939 functionality. This allows the generator to be integrated into a higher level control system. The gen-erator can be remotely started and stopped. All electrical data can be accessed via the bus: voltage, current, frequency and power. Monitoring information such as cooling, exhaust and oil temperatures etc. can also be accessed.

xControl  
Communication Interface  
Article No.

Adapter cable 15 m  
Article No. 0008899

#### All advantages of the new communication interface:

1. Coordinated identification and address assignment for multiple generators in combination possible
2. No additional programming necessary with the generator's internal controller
3. Secure and reliable connectivity to external bus communication system possible
4. No overloading of the generator system due to external signals
5. preparation for more bus communication modules (E.g. NMEA2000)

Suitable for

■ all x generators

*Compact  
Power*

# Remote Control Panel Panda P4 Control

for Compact Power Panda 4000s Generators

*Compact  
Power*

The Remote Control Panel controls the

- Engine cooling water temperature
- Exhaust temperature
- Oil pressure

If any of these functions show an abnormal status, the genset will shut down.

suitable for

- all i generators

# Remote Control Panel Panda P6 Plus

for Compact Power Panda P6 Plus

*Compact  
Power*

Remote Control Panel Panda P6 Plus  
Article No. 0000139

The standard version remote control panel (for models over 30 kW) monitors the following functions:

- Engine coolant temperature
- Engine exhaust temperature
- Engine oil pressure
- Battery charging
- 230 Volt AC
- Cooling-water leakage (optional)

Suitable for

- 5000 - 15000
- 18 - 65
- all /4 types (e.g. 15/4)
- AGT-DC from 5000 upwards

The generator switches itself off when any of these functions are not in the normal state. An automatic module to start (and stop) the generator via external devices such as timers is optionally available.

# Options for P6 Plus Remote Control Panel

## Master-Slave Combination

for more Monitoring and Control

## Additional Remote Control Panel

A master/slave combination makes it possible to operate the genset with two remote control panels.

For example, the genset can be started up with one remote control panel and stopped with the other. Connecting a second remote control panel affords better control options, which will increase safety

A master/slave combination consists in:

- 2 x Panda P6 Plus remote control panels and
- 2 x slave panel adapters.

**NOTE: One remote control panel is already included in the genset scope of delivery.**

For the Master-Slave configuration the following components are required::

<b>1</b>  1 x Remote Control Panel P6 Plus Article No. 0000139	+	<b>2</b>  2 x Master-Slave Adapter Article No. 0000133	+	<b>3</b>  16-core cable for connecting both panel

# Ad-on modules for Panel P6 Plus

## Automatic system add-on modul for asynchronous gensets

*Compact  
Power*

Remote Control Panel Panda P6 Plus

*Automatic system  
add-on on the back  
of the panel P6+*

## Starting the Generator externally with an external device e. g. timer

The standard P6 Plus remote control panel can be upgraded with an automatic add-on to a „fully automatic panel“. That way, the genset can be started and stopped externally with an external device (e.g. timer). The automatic starting procedure consists of pre-heating (heat) and operating the electric starter (start). The times for “heat”, “start” and “stop” are individually adjustable. To operate an automatic system add-on, it is necessary to install a re-start protection.

Ad-on modules for Panel P6+

■ with Remote Control Panel Panda P6 Plus

# Remote Control Panel AGT Control

for Hybrid Power DC Generators

AGT Control Panel  
Standard  
Art.-No. xxx

## Standard Remote Control Panel

The Remote Control Panel controls the

- Engine Cooling Temperature
- Exhaust Temperature
- Oil Pressure

If any of these functions show an abnormal status, the genset will shut down.

AGT Control  
Custom Panel black  
Article No. 0005943

## Custom Panels

### Panel with LCD display for increased functionality

The AGT control panel is fitted with a graphic display. The display serves to indicate a variety of warning and shut-down functions, which improves safety and convenience compared to a standard remote control panel.

The warning and shut-down functions can be adjusted individually. By default, the system is set so that the maximum operating safety and reliability are ensured. This means that the genset will cut off immediately if an oil pressure or temperature error is found.

suitable for generators

- all DC generators AGT-DC from Panda 5000 upwards
- AC Generators Panda 18 - 65
- AC Generators all /4 types from Panda 7,5/4 (z.B. 15/4) upwards

Hybrid  
Power

# Current Distribution Switching Monitoring

Intelligent solutions for a safe and reliable power supply

It is possible to expand an existing installation or to combine it with the control system of the ship or vehicle.

## Current Distribution

Alternating current current distribution

## Switching

Automatic shore-side power genset switching

## Monitoring

Automatic on-board monitorin

# Parallel Switching Box for i-Generators

More comfort and security on board

Several i-series generators can easily be used in parallel, also generators of different performance classes. No additional cables or boxes are required. Each generator is completely independent and can be operated individually. In parallel, both generators are equally loaded.

PMGi Parallel Inverter

- Multiple generators can be easily connected in parallel - even if they have different outputs using "parallel" inverters (optional).
- Load-Sharing: both generators are equally loaded when operating in parallel.
- Ideal for applications such as multihulls which may benefit from installing various smaller generators to improve weight distribution. Katamarane und Trimarane.

## Domestic Power Circuit

Air conditioning units

Compressoren

Household equipment

suitable for

■ all i-series Generators

# Parallel Switching Box for x-Generators

„Plug and Play“ load switching using xControl

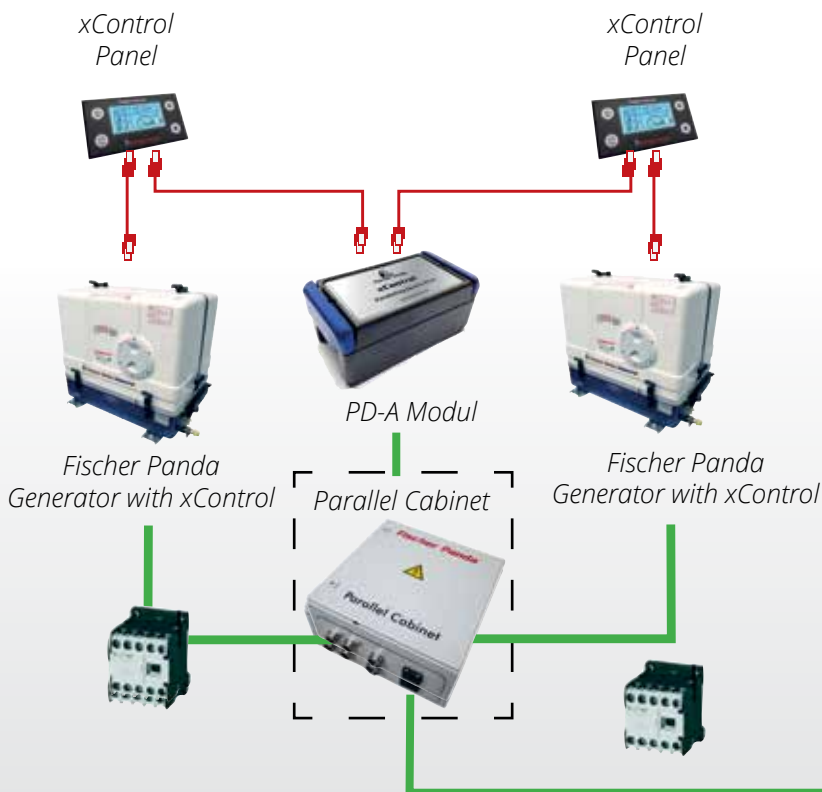

The xControl PD-A (Parallel Device) module allows two Fischer Panda xControl AC generators to be connected in parallel. Electrical loads can be switched from one generator to another (uninterrupted) or their outputs can be combined (load sharing).

suitable for

- 3,8 - 15,3 kW 1ph
- 6,5 - 20,4 kW 3ph
- 25,5 - 40,0 kW 3ph
- 42,5 - 55,2 kW 3ph

The PD-A is connected to each generator's data bus. The generators are set to "parallel-mode" via the xControl display menu. The PD-A monitors both generators and synchronises their output. The load is switched from one generator to the other when their outputs are synchronised. Both single and three phase generators can be connected in parallel using the PD-A module.

All generators with xControl can operate in parallel

# Automatic Shore-Side / Generator Power Switch

Automatic switch-over, when the shore-side power is not available

The shore-side/genset switching unit serves to control the shore-side power in combination with a genset. The switching unit monitors the connection to the shore-side power supply. The AC genset is started up automatically when the shore-side power is not available.

Once the shore-side power supply is available again, the switching unit can switch back so that the shore-side power is again used as the main power source. Stopping the generator leads to an immediate switch back to the shore-side.

Automatic shore-side/generator power switch

Opened switch unit

suitable for

- 3,8 - 10,2 kW (230 V Switch)
- 6,5 - 24,0 kW (400 V Switch)

## Accessory Programme

Servicekits Standard  
Servicekits Plus

## Installations kits

Basis version

Premium version

# Complete installation kits

To keep the installation as simple as possible, Fischer Panda offers complete installation kits. The kits comprise all components that are needed for the complete installation of the cooling water, exhaust gas, and fuel systems of the genset.

### Marine installation kits

The installation kits by Fischer Panda are available in two versions:

#### Basic version

The basic version contains all components required for a standard installation

#### Premium Version

The premium version additionally contains an exhaust gas/water separator unit for greater demands concerning noise reduction. The exhaust gas/water separator unit strongly reduces the exhaust noise. The "water splash" in particular is eliminated. Additionally, the exhaust gas/water separator unit functions as an exhaust gas goose neck, which prevents the water from flowing back into the generator.

Example exhaust system installation

### Components installation kits

The basic version of the installation kit contains the following components for the cooling water, exhaust gas, and fuel installations:

#### Cooling Water Installation

- Through-hull with filter
- Seacock
- Hose connection
- Sea water filter
- Hose clamps
- Coolant hose (4m)
- Ventilation valve

#### Exhaust installation

- Water collector
- Hull outlet
- Hose connection
- Hose bush
- Hose clamps
- Exhaust hose (5m)
- Silencer (optional)  
(only premium version)

#### Fuel Installation

- Fuel hose
- Hose clamps
- Non-return valve
- Fuel filter with water separator (optional)
- Fuel quick-release fasteners (optional)

### Installationskit Basic version

#### Fuel installation

Fuel hose  
Hose clamps  
Non-return valve

#### Cooling water installation

Through-hull with filter  
Seacock  
Hose connection  
Sea water filter  
Hose clamps  
Coolant hose (4m)  
Ventilation valve

#### Exhaust installation

Water collector  
Hull outlet  
Hose connection  
Hose bush  
Hose clamps  
Exhaust hose (5m)  
Silencer  
Exhaust / water separator (only premium version)

#### Premium version

contains an additional  
water collector

### Basic version installation kits

#### without exhaust/water separator

The basic version installation kits contains all components except the exhaust/water separator.

## Exhaust sytem for marine gensets

- ① Water lock
- ② Exhaust/water separator
- ③ Cooling water hose / exhaust hose
- ④ Hose clamps
- ⑤ Threaded coupling with hose connection
- ⑥ Sea valve / ball valve
- ⑦ Through-hull
- ⑧ Silencer
- ⑨ Rubber through-hull for exhaust outlet

## ① Water lock / silencer

Material: made from stainless steel and sheathed in rubber.

Installation: The water lock is fitted with attachment tabs and is thus very easy to install. It is installed at the lowest point of the exhaust system.

The water lock also provides particularly good noise reduction.

Water lock / Silencer

### Water lock / silencer

Article No.	Connecting diameter
0000830	40 mm
0000831	50 mm
0000832	60 mm

Active water lock

## ① OPTIONAL: Active water lock

(Item is not included in installation kit, can be ordered as optional item).

For difficult installation situations and/or if the genset is used with severe inclination, the use of the active water lock in combination with a follow-up control and a pump ensures the reliable emptying of the water lock, which minimises the risk of the engine being flooded.

Exhaust/water separator

Exhaust/water separator  
with noise reduction  
coating

## ② Exhaust/water separator

Material: stainless steel  
The exhaust/water separator by Fischer Panda allows for the physical separation of exhaust and seawater and acts as a goose neck at the same time. Exhaust and water are evacuated separately with almost no pressure. The exhaust noises emanating from the exterior of the yacht are strongly diminished. The “water splash” in particular is eliminated. The noise reduction coating can further reduce the exhaust noise.

Exhaust/water separator

0002224	40-30-40 mm, soundproof
0002226	50-40-50 mm, soundproof
0002228	60-50-60 mm, soundproof

## ③ Exhaust hose with wire helix inside

Materials: woven rubber with wire inner helix  
The exhaust hose is extremely lightweight and flexible. Bends with a radius of 2 x the hose diameter can be routed.

(Figures shows unit with bracket and connecting line)

Oilmaster 12 V oil change pump (without bracket and connecting line)	
0012061	Mini-Puppy 12 VDC continuous current impeller pump

Oilmaster electrical oil change pump

Makes oil changes clean and convenient

The electrical 12 VDC Oilmaster pump can be permanently installed or used as a portable unit. As standard, the cables are fitted with alligator clips and can be connected directly to the ship/vehicle battery. The pump works bi-directionally, i.e., it can suction off the used oil and then feed in fresh oil in the opposite direction.

All Panda gensets are equipped with a connection line on the oil pan for connecting the Oilmaster pump.

It is also possible to supply several engines simultaneously. For this purpose, the suction/pressure connection of the pump can be fitted with as many branches as desired by using a distribution station.

The electric pump of the Oilmaster is self-priming and allows for a delivery head of up to 0.5 mm. The Oilmaster is thus suitable for any engine system and is ideal for yachts and vehicles with gensets where the oil connection is difficult to access.

The Oilmaster facilitates a regular oil change and helps operate the engine with consistently clean and pure engine oil.

Standard Kits 1 to 17  
Plus Kits 1 to 29

## Servicekits original parts only

The Fischer Panda service kits are designed for the routine service tasks.

The service tasks described in the genset manual can be performed by the operator unless highlighted differently in the manual. Additional maintenance work must be implemented by specially trained technical personnel or by authorised workshops (Fischer Panda Service Points), only. This applies in particular to valve adjustments, work on the diesel injection system, and to engine repairs.

The Fischer Panda service kits contain only original genset spare parts.

## Service Kits Standard

Service Kits Standard 1 to 17

The Fischer Panda service kits contain original genset spare parts. The kits are designed for the routine service tasks.

## Service Kits Plus

Service Kits Plus 1 to 29

The Fischer Panda service kits contain original genset spare parts for routine service tasks and all parts for the initial 600 h service intervals.

The Fischer Panda service kits Plus are supplied in a convenient water-proof plastic box.

# Standard Service Kits

## Standard Service Kits 1 to 17

#### Haftungsausschluss:

Alle technischen Daten wie Maßangaben, Leistungsdaten, Gewicht, Materialspezifikation usw. sind nur gültig, wenn sie eine ausdrückliche Bestätigung erhalten haben. Bei allen Angaben ist zu berücksichtigen, dass diese nur dem derzeitigen technischen Stand entsprechen können. Bei den Abmessungen handelt es sich um die Abmessungen des Schalldämmgehäuses. Überstehende Teile wie Verschlüsse, Fittings, U-Profil etc. sind nicht berücksichtigt. Der Besteller muss sich in jedem Einzelfall rückversichern, dass die Angaben mit seinen Vorgaben übereinstimmen. Alle Leistungsdaten beziehen sich auf Luft- und Wassertemperatur von 20°.

#### Disclaimer:

The information contained here is to the best of our knowledge accurate at the date of publication. Please note that the data in this publication reflects the technical state at time of print. Dimensions apply for the sound insulation capsule only and do not include latches, fittings etc. Additional room will need to be calculated for installation to include hoses, cables and capsule mountings. Additional components or alternators may also affect capsule dimensions. Due to our policy of continual product development, we reserve the right to alter technical specifications without notice. All performance data relates to air and water temperatures of 20°C unless otherwise stated.
